Common code between the pages

Footer

```html
<footer aria-label="Footer">
    <div class="main-footer-container">
      <ul>
        <li><h2>Agency</h2></li>
      </ul>
      <ul>
        <li class="footer-list-title">MENU</li>
        <li><a href="index.html" title="About us link" aria-label="About us link">About us</a></li>
        <li><a href="#" title="Services link" aria-label="Services link">Services</a></li>
        <li><a href="#" title="Blog link" aria-label="Blog link">Blog</a></li>
        <li><a href="contact.html" title="Contact link" aria-label="Contact link">Contact</a></li>
      </ul>
      <ul>
        <li class="footer-list-title">SERVICES</li>
        <li><a href="#" title="Design link" aria-label="Design link">Design</a></li>
        <li><a href="#" title="Development link" aria-label="Development link">Development</a></li>
```

```html
            <li><a href="#" title="Marketing link" aria-label="Marketing link">Marketing</a></li>
            <li><a href="#" title="See more link" aria-label="See more link">See more</a></li>
          </ul>
          <ul>
            <li class="footer-list-title">OUR SOCIAL NETWORKS</li>
            <li>
              <div class="social-media-container">
                <button class="social-media-btn facebook" aria-label="Facebook button"></button>
                <button class="social-media-btn twitter" aria-label="Twitter button"></button>
                <button class="social-media-btn instagram" aria-label="Instagram button"></button>
              </div>
            </li>
          </ul>
        </div>

        <div class="legal-info-container">
          <ul>
            <li>Copyright © 2022 Laaqiq. All Rights Reserved.</li>
            <li>Header background image on the bog by rawpixel.com on Freepik.com</li>
          </ul>
          <ul>
            <li><a href="#" aria-label="Terms of use link">Terms of use</a></li>
          </ul>
          <ul>
            <li><a href="#" aria-label="Privacy policy link">Privacy policy</a></li>
          </ul>
        </div>
    </footer>
```

CSS:

```css
footer{ margin: 40px; }
footer a {
    font-weight: bold;
    color: black;
}

.main-footer-container {
    display: grid;
    grid-template-columns: repeat(4, 1fr);
    grid-template-rows: 2fr;

    margin-top: 20px;
    padding: 10px;

    border: 2px #EF6D58 solid;
    border-width: 2px 0 2px 0;
}

.legal-info-container {
    display: grid;
    grid-template: 1fr / 60% 20% 20%;
}

.social-media-btn{
    background-color: #C43721;
    border: none;
    border-radius: 100px;

    align-items: center;
    justify-content: center;

    width: 40px;
    height: 40px;

    margin-right: 5px;
```

```css
    background-repeat: no-repeat;
    background-position: center;
}

/* Buttons that use the social-media-button class */

.facebook{ background-image: url('img/facebook.svg'); }
.twitter{ background-image: url('img/twitter.svg'); }
.instagram{ background-image: url('img/instagram.svg'); }

.phone{ background-image: url('img/phone.svg'); }
.email{ background-image: url('img/email.svg'); }
.compass{ background-image: url('img/compass.svg'); }

.social-media-btn:hover{ background-color: #EF6D58; }
.phone:hover, .email:hover, .compass:hover { background-color: #C43721; }

.legal-info-container a{ float: right; }
```
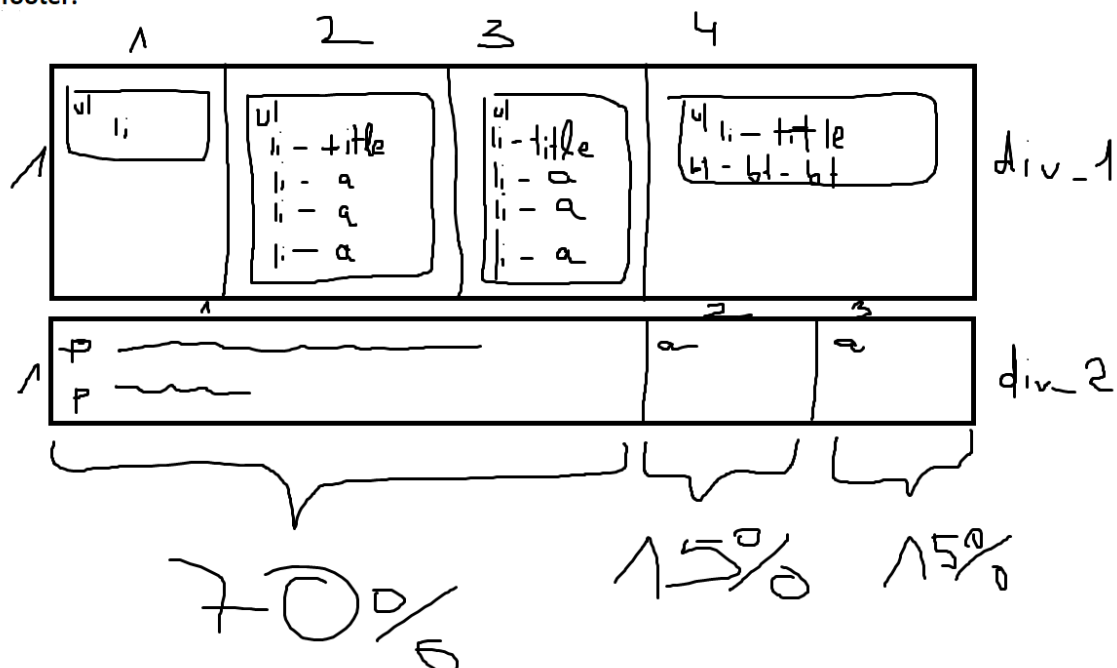

footer:

The way that the footer is structured:

- Div_1: it's a grid-styled div that contains four lists (one for each column) as each link is vertically aligned on top of the last, including the lists with the buttons. Also added the single title from col. 1 as a list so it has the same styling as the other parts.
- Div_2: Contains legal stuff. Has 3 columns (the first one is 70% and the other two 15% each). The last two columns contain two links to legal disclaimers, while the first one contains copyright information.

The buttons with the icons are all (social-media-btn), so they all have the same width, height and background settings. Same goes for all links in the lists, as they all have to look the same.

Nav

```html
<nav aria-label="Navigation bar">
    <div>
        <a href="index.html"><img src="img/logo.svg"
height="75" width="100" alt="logo"></a>
        <a class="nav-btn" href="index.html"
title="About us link" aria-label="About us link">About
us</a>
        <a class="nav-btn" href="#" title="Services
link" aria-label="Services link">Services</a>
        <a class="nav-btn" href="#" title="Pricing
link" aria-label="Pricing link">Pricing</a>
        <a class="nav-btn"
href="color_theory_for_designers.html" title="Blog link"
aria-label="Blog link">Blog</a>
        <a class="contact-btn" href="contact.html"
title="Contact link" aria-label="Contact-
link">CONTACT</a>
    </div>
</nav>
```

CSS:

```css
nav {
    background-color: #28293E;

    align-items: center;
    justify-content: center;
```

```css
    display: flex;
    position: fixed;

    width: 100%;
    top: 0;
}

nav div{
    display: inline-flex;
    align-items: center;
    justify-content: center;
}

nav img{ margin-right: 120px; }

.nav-btn{
    padding:10px;
    margin-right: 20px;
    margin-left: 20px;

    background: none;
    border: none;
    color: white;
}

.nav-btn:hover{
    border: 3px #C43721 solid;
    border-width: 0 0 3px 0;
}

.contact-btn{
    padding:15px;
    padding-right: 40px;
    padding-left: 40px;

    margin-left: 120px;

    background-color: #C43721;
```
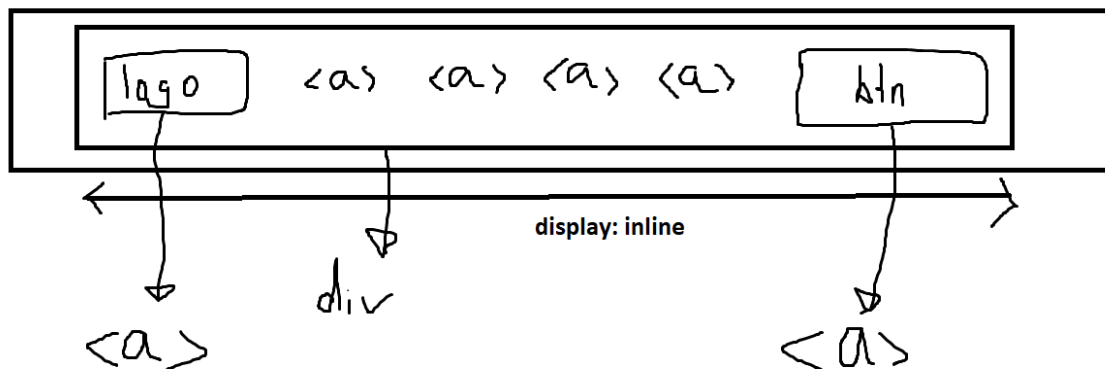

```
    color: white;

    border: 2px #EF6D58 solid;
    border-radius: 5px;
}

.contact-btn:hover{ background-color: #28293E; }
```

nav:

display: inline

The way that the navbar is structred:

- A single div, as all items are aligned horizontally and vertically. Said div is inside the navbar and centered within it so it's positioned in the middle of the page and so are the items inside.

All links have the same class (nav-btn) because they have to look the same. The logo image is added in css with the background-img property for an <a> tag as it has to circle back to the index.html. The CONTACT button is also an <a> tag, as it has to link to the contact.html page.

Text

```
.red-highlight,
.testimonial-container span,
.blog-posts h4 {
    color: #C43721;
}

.team-section h1,
.team-section h3,
.team-section span,
.team-members-container span {
    color: white;
```

```css
}

.section-title {
    color: #C43721;

    padding-top: 20px;
    margin-top: 5px;

    font-weight: bold;
    font-family: 'Courgette', cursive;
    font-size: 54px;
}

.small-title{
    font-weight: bold;
    color: #C43721;
}
```

All text with the #c43721 color has the red-highlight class apart from the specific items that do not have a class added to them in the html. The section-title class is for the article titles in the color design article. And the small-title class is for all the normal size text that needs to be colored but also bold.

General configuration

```css
h1, h2, h3, h4, h5, h6 { margin: 0px; }
ul{ margin-left: 0px; }
a{ text-decoration: none; }
section{ width: 100%; }

li{
    list-style: none;

    margin-left: 0px;
    padding: 7.5px;
}
```

- Removed all the underlines from links
- Removed all bullets from lists
- Removed some pre-applied margins (h1-h6 and ul)
